

*I claim:*

*1. All pencil sharpener shavings storage receptacles are produced without uniformity; and integration with any pencil sharpener introduced into the crowded market is impossible, rendering all pencil sharpeners useless upon loss, misplacement of, or damage to said shavings receptacle, therefore, the improvement, wherein, said combination bottle cap pencil sharpener is adapted to hand-thread unto any used/re-cycled plastic beverage container, doubles pencil shavings storage capacity, solving elementary class room pencil waste clean-up concerns, adding instruction time and saving custodial clean-up time in the classroom.*
